

memcare CIP PACKAGE

IXOM understands membrane cleaning. Our MemCare Package delivers a comprehensive membrane care solution designed to optimise your membrane plant's performance and reliability.

Meet Leighton Butler, Membrane Specialist

With over 22 years of experience in the New Zealand Dairy Industry, Leighton provides expert support to enhance CIP effectiveness, reduce plant turnaround time, and improve membrane flux recovery, all part of the MemCare CIP package.

TRAINING, OPERATION & CARE

IXOM offer tailored, plant-specific membrane and CIP training for operators and key personnel. Regular reviews of CIP and operational processes are conducted and benchmarked to identify areas for improvement.

SPECIALIST RANGE OF MEMBRANE CHEMICALS

IXOM supplies a proven range of high-performing membrane cleaning products, including a comprehensive enzymatic range. We can also customise remedial cleaners and cleaning regimes to restore performance following fouling events.

DESIGN & OPTIMISATION OF CIP

Our team can design, commission, and benchmark new CIP processes, drawing on extensive product and industry knowledge. We focus on maximising membrane lifespan and improving efficiency across chemical use, energy, water, and time.

MEMBRANE AUTOPSY & ANALYSIS SERVICE

This diagnostic service identifies the root causes of membrane performance decline or failure. It's a valuable tool for troubleshooting and long-term continuous improvement, helping to extend membrane life and enhance reliability.

FULL RO & UF MEMBRANE PILOT PLANT

Our New Zealand-based facility allows us to deliver fast, local support. We offer analytical and soil testing through on-site facilities and specialist University testing equipment.

MEMBRANE SOIL FOULING ASSESSMENTS

IXOM can identify specific fouling types affecting your membranes and will tailor your CIP, ensuring more effective cleaning and extended membrane performance.

LET'S CONNECT
